SVS IGCSE Programme – September 2014

SVS is currently accepting students for our inaugural IGCSE programme for the coming academic year 2014-15. It has been decided by the school management that our IGCSE students will study five of their eight O levels in Year 10, which will be followed up by the remaining three and their AS/A level subjects in Year 11 and 12.

Students must study the following three mandatory subjects for Year 10:

- English as a Second Language
- Mathematics
- Chemistry

Students then make a selection of two further subjects from the following options:

- One of Physics or Information Technology; and one of Biology or Business Studies.

Choosing where your child will attend school, especially for IGCSE, is one of the most important decisions you will make as a family. We at Smart Village School believe that we offer not only a truly exceptional academic programme, but also a school environment that is conducive to your child’s social, moral and physical well-being.

We look forward to working with you as you begin the application and enrollment process. The process includes an interview with the Head of Secondary and the Director of the school. This is followed up by an entrance exam in English and Mathematics.

Gerard Mc Andrew

Head of Secondary, Kipling
